

SCM EXTENDED WAREHOUSE MANAGEMENT

*Configuration Guide
with Process Flows*

Vol-1

C.K. Reddy

Table of Contents

1. Overview	35
2. Warehouse management Systems (WMS)	35
3. History of extended warehouse management	36
4. Deployment Options	38
5. Business Function Requirement	39
6. ERP-EWM integration	40
6.1 Name Logical System	40
6.2 Assign Logical System to a Client	40
6.3 Specify SAP APO Release	41
6.4 Set Up RFC Destination	42
6.5 Assign RFC Destinations to Different Application Cases	43
6.6 Set Target System and Queue Type	44
7. Integration set up in EWM	44
7.1 Name Logical Systems	44
7.2 Assign Logical Systems to a Client	44
7.3 Set Up RFC Destination	45
7.4 Assign RFC Destinations to Various Application Cases	46
7.5 Maintain Business System Group	47
7.6 Assign Logical System and Queue Type	47
8. ERP-EWM Integration in S/4 HANA	48
8.1 Name Logical System	48
8.2 Assign Logical System to a Client	48
8.3 Specify SAP APO Release	48
8.4 Set Up RFC Destination	49
8.5 Determine RFC Destinations for Method Calls	50
8.6 Determine RFC Destinations for Method Calls from SAP S/4HANA EWM	50
8.7 Assign RFC Destinations to Different Application Cases	51
8.8 Set Target System and Queue Type	51

SCM EXTENDED WAREHOUSE MANAGEMENT

9.	CIF application	52
10.	qRFC Functionality for Data distribution	55
10.1	qRFC setup in ERP system	57
10.1.1	Queue Administration	57
10.1.2	QOUT Scheduler	58
10.1.3	QIN Scheduler	58
10.2	qRFC setup in EWM system	59
10.2.1	Queue Administration	59
10.2.2	QOUT Scheduler	60
10.2.3	QIN Scheduler	60
10.3	qRFC setup in S/4 HANA system	60
10.3.1	Queue Administration	60
10.3.2	QOUT Scheduler	61
10.3.3	QIN Scheduler	61
11.	ERP Org Structure	62
11.1	Company code	62
11.2	Purchasing Organization	63
11.3	Sales Organization	63
11.4	Plant	64
11.5	Assign purchasing organization to plant	64
11.6	Assign sales organization - distribution channel – plant	64
11.7	Storage locations	65
11.8	Shipping Point	65
11.9	Assignment of plant & shipping point	65
11.10	Warehouse	66
11.11	Assignment of warehouse	66
11.12	Assign Goods Receiving Points for Inbound Deliveries	66
11.13	Assign Shipping Points According to Storage Location	67
11.14	Delivery Split by Warehouse Number	67

SCM EXTENDED WAREHOUSE MANAGEMENT

11.15	Configure SAP EWM-Specific Parameters	67
11.16	Assign Warehouse Number to Warehouse Number of Decentralized SCM System	68
11.17	Generate distribution model	68
11.18	Plant & Shipping point Integration.....	70
11.18.1	Integration in ERP & SCM EWM	70
11.18.2	Integration in S/4 HANA Environment	73
12.	Master Data Integration	74
12.1	Vendor and customer integration with SCM EWM	74
12.2	Vendor and customer integration in S/4 HANA Environment	75
12.3	Product master integration in ERP & SCM EWM	77
12.4	Product master integration in S/4 HANA Environment	77
12.5	Unique product numbers from different ERP systems (SCM EWM)	78
13.	EWM Org structure	79
13.1	Warehouse	79
13.1.1	Define warehouse	79
13.1.2	Copy from standard warehouse	80
13.1.3	Activate BC sets	80
13.2	Assign Warehouse Numbers	81
13.2.1	Supply Chain Unit	82
13.2.2	Party entitled to dispose and Custodian	82
13.3	Define warehouse number control	84
13.4	Define Number Ranges	86
13.5	Storage Type	87
13.5.1	General Control	88
13.5.2	Putaway Control	94
13.5.3	Stock removal control	105
13.5.4	Goods movements control	108
13.5.5	Replenishment control	109

SCM EXTENDED WAREHOUSE MANAGEMENT

13.6	Storage Section	109
13.7	Storage bin	110
13.7.1	Define Storage Bin Types	111
13.7.2	Define Bin Access Types	111
13.7.3	Define Storage Bin Identifiers for Storage Bin Structures	112
13.7.4	Define Storage Bin Structure	112
13.7.5	Maintain storage bins	113
13.7.6	Generate with storage bin template	113
13.7.7	Load Storage Bins	114
13.7.8	Create storage bin	114
13.7.9	Mass change to bins	118
13.8	Activity area	118
13.8.1	Define Activities	119
13.8.2	Define Activity Area	119
13.8.3	Assign Storage Bins to Activity Areas	120
13.8.4	Define Sort Sequence for Activity Area	120
13.8.5	Generate Activity Area from Storage Type	121
13.9	consolidation group	122
13.9.1	Define Number Range Intervals for Consolidation Group	122
13.9.2	Assign Number Range Intervals to Consolidation Groups	123
13.9.3	Define Consolidation Group	124
13.9.4	Maintain Consolidation Group	124
13.9.5	Consolidation group against activity area	124
13.10	Staging area	125
13.10.1	Define Staging Areas	125
13.10.2	Staging area and door determination group	126
13.11	Warehouse Door	126
13.11.1	Define Warehouse Door	126
13.11.2	Assign Staging Area/Door Determination Group to Door	127

SCM EXTENDED WAREHOUSE MANAGEMENT

13.11.3	Assign Staging Area to Warehouse Door	127
13.12	Work Centre	128
13.12.1	Specify Work Center Layout	128
13.12.2	Define Work Center	129
13.12.3	Define Master Data Attributes	130
13.12.4	Optimizing Work center determination	130
14.	Product master.....	131
14.1	Properties 1	131
14.2	Properties 2	132
14.3	Classification	134
14.4	Unit of measurement	134
14.5	Packaging data	135
14.6	Storage data	137
14.7	Warehouse data	142
14.8	Slotting	155
14.9	Storage type data	157
15.	Availability group	160
15.1	Define Availability Group	160
15.2	Define Non-Location-Dependent Stock Type.....	161
15.3	Configure Stock Type	161
15.4	Assign Availability Group to Storage Type	162
15.5	Determining the ERP stock type and the ERP storage location	163
15.6	Stock type determination at inbound delivery creation	164
15.7	Stock type determination at outbound delivery creation	164
15.8	Conclusion	164
16.	Serial Number Management	165
16.1	Serial Number Profile.....	165
16.1.1	Serial Number Profile in ERP system	165
16.1.2	Serial number profile in Decentralized EWM system	166

SCM EXTENDED WAREHOUSE MANAGEMENT

16.1.3	Serial number profile in S/4HANA Embedded EWM system	169
16.1.4	Master data set-up.....	171
17.	Batch Management.....	172
17.1	ERP Batch level	173
17.2	Configuration settings in EWM (Decentralized)	174
17.3	Organizational area set up in both systems.....	175
17.4	Create Class / Characteristics in ERP	177
17.5	Batch Class / Characteristics in EWM	178
17.6	Create batches in ERP	179
17.7	Product batch in EWM	181
17.8	Batch management in S/4HANA embedded EWM	182
17.9	Documentary Batch	183
18.	Handling Unit Management	184
18.1	Handling Unit Management in Decentralized EWM.....	185
18.1.1	Configuration in ERP	185
18.1.2	Configuration in EWM	188
18.1.3	Master Data Creation	192
18.2	Handling Unit Management in S/4HANA embedded EWM	193
18.2.1	Configuration in Logistics – General	193
18.2.2	Configuration in SCM Extended Warehouse Management	195
18.2.3	Configuration in Additional Material Attributes	196
19.	Warehouse process type	197
19.1	General settings	198
19.2	Control for putaway/Stock removal	200
19.3	Settings for storage process	201
19.4	Settings for posting changes	201
19.5	Settings for warehouse requests	202
20.	Warehouse task	203
20.1	Define number range for warehouse task	203

SCM EXTENDED WAREHOUSE MANAGEMENT

20.2	Product warehouse task	204
20.2.1	Product warehouse task in GUI	205
20.2.2	Product warehouse task in RF	207
20.3	Handling Unit Warehouse Task	208
20.3.1	HU warehouse task in GUI	208
20.3.2	HU warehouse task in RF	210
21.	Warehouse Order	211
21.1	Define number range for warehouse order	211
21.2	Warehouse Order Creation rule	212
21.2.1	Sort Rules for Warehouse Tasks	213
21.2.2	Filters for Warehouse Order Creation Rules	214
21.2.3	Limit Values for the Size of a Warehouse Order	215
21.2.4	Packing Profile for Warehouse Order Creation	216
21.2.5	Define Creation Rule for Warehouse Orders	217
21.2.6	Define Search Sequence of Creation Rules for Activity Areas	218
22.	Putaway strategies and stock removal strategies	218
22.1	Putaway search at storage type level	219
22.1.1	Define Storage Type Search Sequence for Putaway	219
22.1.2	Assign Storage Types to Storage Type Search Sequence	220
22.1.3	Define Putaway Control Indicator	220
22.1.4	Specify Storage Type Search Sequence for Putaway	221
22.1.5	Optimize Access Strategy for Storage Type Search: Putaway	222
22.2	Putaway search at storage section level	222
22.2.1	Create Storage Section Indicators	223
22.2.2	Maintain Storage Section Search Sequence.....	223
22.2.3	Storage Section Check	224
22.3	Putaway search at storage bin level	224
22.3.1	Define Storage Bin Types	224
22.3.2	Alternative Storage Bin Type Sequence	225

SCM EXTENDED WAREHOUSE MANAGEMENT

22.3.3	Assign Storage Bin Types to Storage Types	225
22.4	HU type check for putaway	226
22.4.1	HU type check activation at storage type level	226
22.4.2	Define HU Types for Each Storage Type	226
22.4.3	Define HU Types for Each Storage Bin Type	226
22.5	Stock removal search	227
22.5.1	Specify Stock Removal Rule	228
22.5.2	Specify Storage Type Search Sequence	229
22.5.3	Define Stock Removal Control Indicator	229
22.5.4	Determine Storage Type Search Sequence for Stock Removal	230
22.5.5	Optimization of Acc Strategies for Stor. Type Det. in Stck Rmvl	230
23.	Inbound Process Flow	231
23.1	Simple inbound process	231
23.1.1	Create purchase order	231
23.1.2	Create Inbound delivery	232
23.1.3	Maintain Inbound Delivery Notification	235
23.1.4	Maintain Inbound Delivery	240
23.1.5	Goods Receipt	243
23.1.6	Create Warehouse task.....	245
23.1.7	Confirm Warehouse Task.....	247
23.2	Simple Inbound Process (S/4 HANA-Embedded)	251
23.2.1	Create Purchase order	251
23.2.2	Create Inbound delivery	252
23.2.3	Maintain Inbound delivery	253
23.2.4	Goods Receipt	255
23.2.5	Create Warehouse Task	257
23.3	Reverse Goods Receipt	259
23.4	Partial Goods receipt against inbound delivery.....	262
23.5	Multiple Goods receipts against inbound delivery	265

SCM EXTENDED WAREHOUSE MANAGEMENT

23.6	Reject Inbound delivery	269
24.	Inbound process of serialized material	271
24.1	Inbound process of serialized material (SN @ Inventory level)	271
24.2	Inbound process of serialized product (SN @ Warehouse level)	279
24.3	Inbound process of serialized product (SN @ Document Item Level)	286
24.4	Products with different SN requirements in different warehouses	293
25.	Goods receipt of batch managed products in to warehouse	298
25.1	Batch information in purchase order	298
25.2	Batch information in ERP inbound delivery	302
25.3	Batch information in EWM inbound delivery	305
25.4	Documentary Batch	308
26.	Inbound process with Handling Units	312
26.1	Handling Unit from ERP System	313
26.1.1	Create purchase order	313
26.1.2	Create inbound delivery	313
26.1.3	Maintain Inbound Delivery Notification	314
26.1.4	Maintain Inbound delivery	315
26.1.5	Create Warehouse Task	317
26.2	Inbound process with EWM generated HU in EWM	318
26.2.1	Create purchase order	318
26.2.2	Create inbound delivery	318
26.2.3	Maintain Inbound Delivery Notification	319
26.2.4	Maintain Inbound delivery	319
26.2.5	Create Warehouse Task	322
26.3	Inbound process with higher-level HUs	323
26.3.1	Create purchase order	323
26.3.2	Create inbound delivery	324
26.3.3	Maintain Inbound Delivery Notification	325
26.3.4	Maintain Inbound delivery	325

SCM EXTENDED WAREHOUSE MANAGEMENT

26.3.5	Create Warehouse Task	327
26.4	Inbound process with lower-level HUs	328
26.4.1	Create purchase order	328
26.4.2	Create inbound delivery	329
26.4.3	Maintain Inbound Delivery Notification	329
26.4.4	Maintain Inbound delivery	330
26.4.5	Create Warehouse Task	333
26.5	Inbound Packaging/Repackaging in S/4HANA embedded EWM_1	333
26.5.1	Create purchase order	334
26.5.2	Create inbound delivery	334
26.5.3	Maintain Inbound delivery (EWM)	335
26.5.4	Create Warehouse Task	336
26.6	Inbound Packaging/Repackaging in S/4HANA embedded EWM_2	337
26.6.1	Create purchase order	337
26.6.2	Create inbound delivery	337
26.6.3	Maintain inbound delivery (EWM)	338
26.6.4	Create Warehouse Task	340
26.7	Inbound Packaging/Repackaging in S/4HANA embedded EWM_3	341
26.7.1	Create purchase order	342
26.7.2	Create inbound delivery	342
26.7.3	Maintain inbound delivery (EWM)	343
26.8	Expected Goods Receipt	345
26.8.1	Configuration	346
26.8.2	Pulling Expected Goods Receipts into EWM from ERP	347
26.8.3	Maintain Notification of Goods Receipt	348
26.8.4	Maintain Expected Goods Receipt	349
26.8.5	GR Preparation	349
26.8.6	Maintain Inbound Delivery	352
26.8.7	Check Purchase order at ERP	352

SCM EXTENDED WAREHOUSE MANAGEMENT

26.8.8	Pushing Expected Goods Receipts from ERP to EWM	353
26.8.9	Expected Goods Receipt in S/4HANA embedded EWM system	353
27.	Packaging Specification	354
27.1	Packaging Specification Structure	355
27.1.1	Define Number Range for Packaging Specification	356
27.1.2	Define General Packaging Specification Parameters	356
27.1.3	Define Packaging Specification Group	357
27.1.4	Define Level Type	357
27.1.5	Define Element Type	358
27.1.6	Define Level Set	358
27.1.7	Define Work Step Type	359
27.1.8	Define Packaging Material Types	359
27.1.9	Assign Packaging Material Type to Element Type	360
27.1.10	Assign Work Step Type to Packaging Material Type	360
27.2	Determination of Packaging Specifications	360
27.2.1	Create Field Catalog	360
27.2.2	Define Condition Tables	361
27.2.3	Define Access Sequences	362
27.2.4	Define Condition Types	362
27.2.5	Define Determination Procedure	363
27.2.6	Create Condition Maintenance Group	363
27.3	Maintain Packaging Specification	364
27.4	Maintain Packaging Work Step	366
27.5	Maintain Level Element Group	367
27.6	Printing of packaging specification	368
27.7	Packaging specification in S/4HANA embedded EWM.....	369
28.	Automatic HU creation for products during inbound delivery in EWM	369
28.1	Maintain Determination of Packaging Specifications	370
28.2	Assign packaging determination procedure for inbound document type	371

SCM EXTENDED WAREHOUSE MANAGEMENT

28.3	Process	371
28.3.1	Maintain packaging specification	371
28.3.2	Create inbound delivery	372
28.3.3	Maintain inbound delivery notification	373
28.3.4	Maintain inbound deliver	373
29.	Automatic HU creation for products (Mixed Batches) during inbound delivery in EWM 375	
29.1	Process	375
29.1.1	Maintain packaging specification	375
29.1.2	Create inbound delivery	376
29.1.3	Maintain inbound delivery notification	377
29.1.4	Maintain inbound delivery	378
30.	Automatic HU creation for mixed products during inbound delivery in EWM 379	
25.1	Process	379
30.1.1	Maintain Determination of Packaging Specifications	379
30.1.2	Assign packaging determination procedure for inbound document type 380	
30.1.3	Maintain reference product	380
30.1.4	Maintain packaging specification	381
30.1.5	Create inbound delivery	382
30.1.6	Maintain inbound delivery notification	383
30.1.7	Maintain inbound delivery	383
31.	Automatic Multi-level HU creation during inbound delivery in EWM	384
31.1	Process	384
31.1.1	Maintain packaging specification	384
31.1.2	Create inbound delivery	386
31.1.3	Maintain inbound delivery notification	387
31.1.4	Maintain inbound delivery	387
32.	Automatic HU creation during inbound delivery in S/4HANA embedded EWM 389	

SCM EXTENDED WAREHOUSE MANAGEMENT

33.	Inbound process with deconsolidation	389
33.1	Configuration	390
33.1.1	Define Process-Oriented Storage Control	390
33.1.2	Define Warehouse Process Type	391
33.1.3	Define Control Indicators for Determining Warehouse Process Types	392
33.1.4	Determine Warehouse Process Type	392
33.1.5	Define Storage Type for work center	392
33.1.6	Specify Work Center Layout	393
33.1.7	Define Work Center	394
33.1.8	Create Storage Bin for work center	394
33.1.9	Define Master Data Attributes for work center	395
33.1.10	Define Attributes for Deconsolidation	395
33.1.11	Specify Deconsolidation Station	396
33.1.12	Maintain POSC set-up (source and destination bins) for external steps	396
33.2	Deconsolidation Process	396
33.2.1	Create Inbound delivery	396
33.2.2	Maintain Inbound Delivery Notification	397
33.2.3	Maintain Inbound Delivery	398
33.2.4	Create warehouse task	398
33.2.5	Check monitor for WT details	399
33.2.6	Deconsolidation at work center	400
33.3	Deconsolidation process in S/4HANA embedded EWM	405
33.4	Automatic Deconsolidation in RF	405
33.4.1	Maintain packaging specification	405
33.4.2	HU preparation at work center	406
33.4.3	Create inbound delivery	406
33.4.4	Maintain Inbound Delivery Notification	407
33.4.5	Maintain Inbound Delivery	407

SCM EXTENDED WAREHOUSE MANAGEMENT

33.4.6	Receiving of HUs through RF	408
33.4.7	Check monitor for WT details	410
33.4.8	Deconsolidation in RF	410
33.4.9	Check monitor for WT details	412
34.	Inbound process with VAS	413
34.1	Configuration	414
34.1.1	Define Number Range for VAS Order	414
34.1.2	Define Relevance for VAS	414
34.1.3	Warehouse Number-Dependent VAS Settings	416
34.1.4	Define Process -Oriented Storage Process Control	417
34.1.5	Define Warehouse Process Type	418
34.1.6	Define Control Indicators for Determining Warehouse Process Types	419
34.1.7	Determine Warehouse Process Type	419
34.1.8	Define Storage Type for work center	419
34.1.9	Specify Work Center Layout	420
34.1.10	Define Work Center	421
34.1.11	Create Storage Bin for work center	421
34.1.12	Define Master Data Attributes for work center	422
34.1.13	Maintain Packaging Specification.....	422
34.2	VAS Process	423
34.2.1	Create inbound delivery	423
34.2.2	Maintain Inbound Delivery Notification	424
34.2.3	Maintain Inbound Delivery	424
34.2.4	Create warehouse task	426
34.2.5	Check WTs in monitor	426
34.2.6	Create Confirmation for VAS	427
34.2.7	Check WTs in monitor	430
34.3	VAS process in S/4HANA embedded EWM	431
35.	Vendor Returns	431

SCM EXTENDED WAREHOUSE MANAGEMENT

35.1	Configuration in ERP system.....	432
35.1.1	Maintain delivery type for vendor returns	432
35.2	Configuration in ERP system.....	432
35.2.1	Activate or Deactivate Route Determination	432
35.2.2	Define Scheduling Within Route Determination	432
35.3	Master Data	433
35.3.1	Mater data in ERP system	433
35.3.2	Mater data in EWM system	434
35.4	Process.....	435
35.4.1	Create purchase order with return indicator	435
35.4.2	Create delivery	435
35.4.3	Maintain outbound delivery request	436
35.4.4	Maintain outbound delivery order.....	437
35.4.5	Create and confirm warehouse task	437
35.4.6	Goods issue	437
35.4.7	Verify ERP delivery	438
35.4.8	Verify purchase order history	439
36.	Outbound Process Flow	439
36.1	Simple outbound process (SCM EWM Decentralized system)	440
36.1.1	Create sales order	440
36.1.2	Create outbound delivery	442
36.1.3	Maintain Outbound Delivery Request	445
36.1.4	Maintain Outbound Delivery Order	449
36.1.5	Create warehouse task	453
36.1.6	Confirm Warehouse Task.....	454
36.1.7	Post goods issue	456
36.1.8	Maintain Outbound Delivery	456
36.2	Simple outbound process in S/4HANA embedded EWM	457
36.2.1	Create sales order	458

SCM EXTENDED WAREHOUSE MANAGEMENT

36.2.2	Create outbound delivery.....	458
36.2.3	Maintain Outbound Delivery Order.....	460
36.2.4	Create warehouse task.....	461
36.2.5	Post goods issue	462
36.2.6	Maintain Outbound Delivery	463
36.2.7	Verify ERP outbound delivery	463
36.3	Goods issue reversal.....	464
36.3.1	Create outbound delivery in ERP system.....	464
36.3.2	Maintain Outbound Delivery Request	464
36.3.3	Create and confirm WT against outbound delivery order.....	465
36.3.4	Post goods issue	465
36.3.5	Maintain outbound delivery	465
36.3.6	Verify ERP outbound delivery	466
36.3.7	Reverse goods issue.....	466
36.3.8	Verify ERP outbound delivery	467
36.4	Goods issue reversal in S/4HANA embedded EWM.....	467
36.5	Adjust outbound delivery quantity	467
36.5.1	EWM configuration.....	468
36.5.2	Create sales order	468
